

Pipe Cleaner Werewolf

A How To Guide On Making Pipe Cleaner Figures By Nicholas H. Paz

Skeleton

For the Skeleton of your going to need three and a half of pipe cleaners. Connect two of them by twisting the ends together and fold them into an upside down "V" shape. The last long pipe cleaner you fold into a "v" as well, this will be used for the arms. The last pipe cleaner that is cut in half is what will be used for the tail later on.

Once you are finished you should have the same three pieces you see here to your right. A big "V" shape piece for the body and legs, the little "v" shape for the arms, and the half pipe cleaner for the tail.

Werewolf Body

For the Body you will need eight or nine pieces of pipe cleaners, it depends on how long or big you wish the body to be. Connect all the pieces to make one long pipe. Two pipe cleaners for the head, one for the neck, two for the chest, two or one for the stomach, and two for the hips.

After connecting all of the pipe cleaners together coil them up with a pencil or using your finger, do it very lightly so the connected ends don't hurt your at all. When everything is coiled, close up the ends leaving enough space to stick the body skeleton through it.

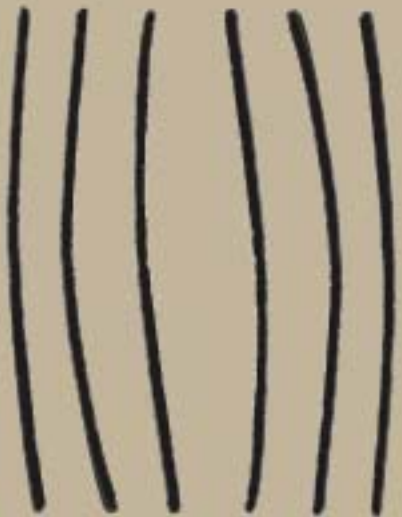

Next you are tightening and widening the coils by twisting them in different directions in order to make the coils smaller or bigger. Once you finish your head and body should look similar to the picture you see on the right. Stick the skeleton through the bottom of the body and out of the tip of the nose. Bend the tip of the skeleton into one of the first coils of the head so it stays keeps its shape.

Werewolf Body & Skeleton

Take the "v" shaped pipe cleaner for the Body and stick it through the the area you wish to have your arms at and loop it around the Body Skeleton inside the Body your made last page. You should have what is shown in the picture below, next we will work on the arms and the legs.

Werewolf Arms

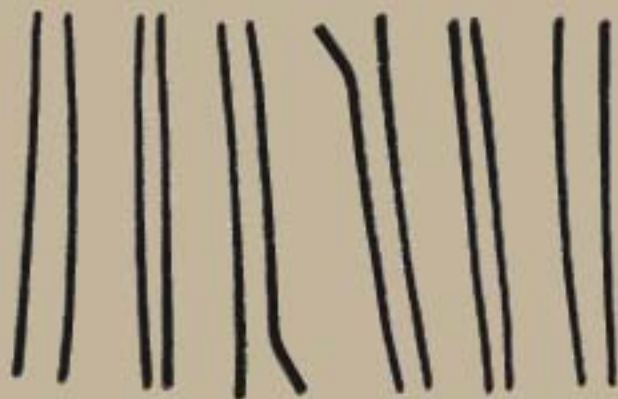

Six full pipe cleaners for the arms, three for each arm. Connect the three pipe cleaners together and coil them using your finger or a pencil. Leave the shoulder end open because that will go into the Body, the other end should have a small opening for the hand.

After Completing the shaping of the arm you should have this shape here in the picture. Once its finished you will stick it through the arm skeleton and twist the shoulder coils through the Body.

Werewolf Legs

The Legs will be needing twelve full pipe cleaners, six for each leg. Do the same as you did for the arms and connect and coil them into a long tube.

After Shaping it into the picture you see here, you want to have the big end coiled shut and the small end with a opening for the feet.

To Connect it to the Body you want to stick the skeleton leg through three or four coils away from the big end, this will be partially weaved into the Body to be the back side of the pipe cleaner figure. Push the skeleton all the way through until its sticking out of the small opening.

Werewolf Body Almost Complete!

When you have connected all the arms and legs to the Body, swirl the ends so that they can keep the shape of the limbs. Next we will be working on the final touches of your pipe cleaner werewolf, which are the hands, feet, ears, and face.

Werewolf Hands

For each hand you will need two full pipe cleaners being the color of what ever you wish your nails to be. Depending on how many fingers you want it will be four or five half pipe cleaners that are the color of your fur.

Take the full pipe cleaner and fold it in half and then bend them a finger digit in length and continue to do that as many times you need for all of your fingers until it looks like the picture you see on the right.

After folding the pipe cleaner into the fingers you want to twist the ends to connect them. You should end up with what you see on the left.

Take the four or five half pipe cleaners and Coil them until you get what you see here on the right.

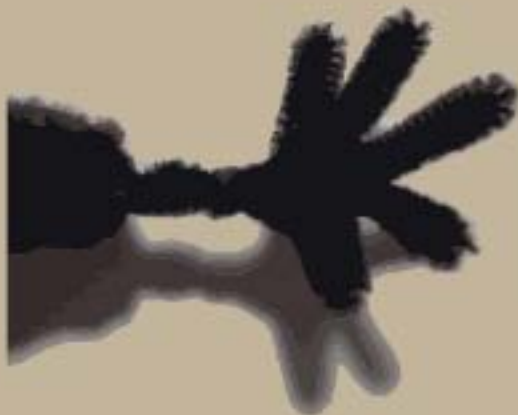

Werewolf Feet

For the feet you will need six pipe cleaners total, one full pipe cleaner and the four pipe cleaners cut in half to make eight half pipe cleaners. Each foot will have one full and four half pipe cleaners.

Do the same as the last step with the hands and coil the half pipe cleaners into the toes and fold the full pipe cleaner into same length as the fingers, but this time only having four digits for toes.

Take the hands and feet and connect them to the Skeleton arms and legs, put on the fingers and toes your coiled up and curl the nails of the hands and feet so they stay together. The connection will be hidden using the coiled fur from the arms and legs.

Werewolf Tail

The Tail will need the half pipe cleaner you had at the beginning that was meant for the Skeleton of the Tail. You will also need four full big fluffy pipe cleaners.

Take the four fluffy pipe cleaners and connect them then coil until you get what you see here on the right with one side pointy, the other with a small opening for the Tail Skeleton to go through.

After you are finished coiling the Tail, take the half pipe and hook it tightly around the lower back section of the Skeleton in the Body and stick the Tail Skeleton through the tail and hook the end of in one of the coils on the pointy side of the fluffy Tail.

Werewolf Ears and Face

For the Face you will need a full pipe cleaner and two finger nail length sized pipe cleaners that are what ever color you wish the eyes to be, and a half of a half pipe cleaner being the color of your nose.

Take the full pipe cleaner and loop it around the head of the Skeleton and swirl the ends into flat circles. After that pinch the tops of the swirls so they are triangle shaped for ears.

After you finish the ears fold the pipe cleaners for the eyes in half. The half of a half pipe cleaner you want to swirl half way and then twist the swirl facing forward for the tip of the nose.

Stick the eyes over one of the coils on the head and then stick the nose into the small opening in the front of the face of the head and you are finished with making the face of your werewolf.

WEREWOLF
COMPLETED
YAY!
