APPLES FOR THE STUDENTS PROGRAM

The Classified Senate Committee had undertaken a program called "Adopt A School". Our goal is to provide a needy elementary school with some of the things that will help to improve their education, and to provide a link between the elementary school and the community college. Our first project is the "Apples For The Students Program". This program provides a way for us to help a school get free Apple computers, printers and other educational tools in exchange for their register tapes. We are collecting pink Safeway receipts to send to Bel Air Elementary School in Pittsburg. With full participation, we will be able to provide our future college students with needed equipment to help further their education.

We know we can count on your support and active participation in this effort to help improve the already high standards of the educational environment of these children.

Give every receipt (no matter how small) to your cluster representative and he or she will see that they become part of the contribution from the Diablo Valley College Classified Senate.
