

CURRICULUM COMMITTEE RECOMMENDATION 3-8-11

In partial response to the charge to the Curriculum Committee, below are two motions we made at the Curriculum Committee today concerning GE. One is our recommendation and the other an affirmation of our task with a target deadline.

The recommendation we are making has the purposes of having consistency with the new district policy and the catalogue language. There is essentially no change nor a recommendation for change to the DVC degree at this time. On page 58 of our catalogue we have 'additional' requirements listed and these are now gone with the District Policy. The clarification of Option 2/3 are the IGETC/CSU patterns, and these never had these requirements.

It was MSC, with no objections, to recommend to the Faculty Senate Council that effective for only the 2011-12 catalog, the current additional graduation requirements: American Institutions, Ecology of Human Health and Physical Education, will become part of Option 1 DVC Local GE requirements and will not be required for Option 2 or 3.

It was MSC, with no objections, to review the DVC Local GE pattern as soon as possible and provide a report to the Faculty Senate Council by May 1, 2011.
