

Electrical / Electronics Technology AS

PROGRAM LEARNING OUTCOMES

1. Identify common electrical circuit components and their use.
2. Solve AC and DC circuits for voltage, current, resistance, power, and other parameters.
3. Operate and understand common laboratory instruments used in the analysis, construction, and troubleshooting of AC and DC circuits.
4. Apply specific sections of the national electrical code to electrical systems.

Complete 60 degree applicable units along with completion of all required general education requirements. It is highly recommended that you see a counselor for specific courses that will best meet your educational plan/goals. Not all courses on the map are offered every term. Consult the Catalog and the Schedule of Classes for more details.
