

Energy Systems AS

PROGRAM LEARNING OUTCOMES

1. Identify, measure, and analyze the major energy uses in typical business operations, focusing beyond the building and into processes.
2. Demonstrate the electrical and energy systems skills to successfully interact with builders, architects, engineers, and constructors and advise on building and systems energy use.
3. Design medium complexity solar photovoltaic or other energy system for medium size commercial buildings and processes.

Careers in

- Field of alternate/renewable energy
- Installation/design/maintenance of these systems

Required
 Elective

You need to see a Counselor for specific recommendations about courses that will best meet your educational goals. Not all courses on the map are offered every term. Consult the Catalog and the Schedule of Classes for more details.
