

Environmental Science AST

PROGRAM LEARNING OUTCOMES

Students completing this program will be able to

1. Recognize and understand chemical components in physical and biological aspects of ecosystems.
2. Apply the scientific method to collect data on environmental problems, and use data to analyze and solve quantitative and qualitative problems.
3. Evaluate the relationship of organisms to each other and to their changing chemical and physical environment.
4. Integrate environmental and economic issues.
5. Demonstrate the proper use of common laboratory equipment and use proper laboratory techniques in running experiments.

You need to see a Counselor for specific recommendations about courses that will best meet your educational goals. Not all courses on the map are offered every term. Consult the Catalog and the Schedule of Classes for more details.
