

Geography AA-T

PROGRAM LEARNING OUTCOMES

Students completing the program will be able to:

1. Describe the various components of the geosystems and explain how they interact.
2. Explain the interaction between physical and human components of the environment and how the nature of interaction varies in different parts of the world.
3. Describe the role and significance of geospatial techniques in assessing and mapping the physical and cultural environments.
4. Describe the characteristics of different cultural realms and demonstrate a respect for diversity that exists between and among cultural or geographic regions.

Careers in

- City planning
- Environmental studies
- Government jobs
- Nonprofit organizations

Complete 60 degree applicable units along with completion of all required general education requirements. It is highly recommended that you see a counselor for specific courses that will best meet your educational plan/goals. Not all courses on the map are offered every term. Consult the Catalog and the Schedule of Classes for more details.
