

How do I complete the Placement Process online?

Step 1:

The Placement Process is the system you use to get placed in the Math, English, or English as a Second Language (ESL) subject that is best suited for you.

If you want a better enrollment date or a priority enrollment, you'll need to complete the online enrollment process, online orientation for new students, and create your educational plan.

The link is:

www.dvc.edu/placement

Step 2:

Once you get onto the website, scroll down until you see "complete the Placement Process", and click on "Begin Placement".

Complete the Placement Process

After applying to DVC and completing the online orientation, complete the placement process to get recommendations for your first-term math and English or ESL classes.

Begin Placement

Step 3:

Once you have completed your placements, you will be able to print/email the results and bring them to your counseling appointment. Within three hours of completing the online placement process, you will be able to enroll in the recommended classes, if it is your date and time to register.

If you have questions about the placement process, please contact the Placement and Proctoring Center.
