Hello everyone! My name is Scott Moses Sunarto; I am an international student majoring in Electrical Engineering and Computer Science. Before going back to college, I used to work as a software engineer in one of the fastest-growing financial technology startups in Indonesia. Since my first day at DVC, I have been deeply embedded in the college's student life and have continuously strived to make it a better place. I am currently the Vice-Chair of ASDVC's Tech Committee, which recently won the best committee award, the Student Representative at DVC's Information and Instructional Technology Committee, and the Founder & President of DVC AppDev. Previously, I have also served in Phi Beta Lambda, one of the campus's largest clubs, as the Computer Applications Committee Head. My professional working experience along with my involvement in college governance and clubs have given me the confidence to take on the challenge of becoming the ASDVC president and to serve as your voice in the college governance system.

As a member of the DVC student body, I am deeply passionate about three central ideas: affordable student housing, affordable study resources, and affordable, yet robust, student healthcare system. The higher education system in the United States has continuously become more expensive than ever before, and I am deeply concerned with how it will affect the community. Some of us have to work harder and harder to pay for college, and that pulls away from our capability to focus on our studies. That is why, during my period serving as the voice of the students, I want to work towards reducing the amount of money one needs to spend during their studies at Diablo Valley College.

If you would like to share any of your ideas or concerns, come catch me on campus! I would definitely love to talk to you over The Crow's Nest legendary spicy crispy ginger chicken (if you haven't tried those, you should!).
Hey y’all, Michael here. I am a Computer Science student with diverse experience in vital collaboration-intensive organizations like being elected as the President of the High School Student and trusted as the Head of Sponsorship Division of a school cup raising US$10,000 – the highest revenue ever in the history of the school!

I am currently in the Senate of DVC Student Government, VP of Software Engineering at DVC AppDev, and the student representative of the DVC Research Planning and Evaluation Committee (RPEC) responsible for policymaking aimed to improve the campus using factual data and trends. I can tell you right now; I love making data-driven decisions!

My background of being in the Computer Science industry may not seemingly reflect my desired position of being in charge of the legislative activities. But I have been hooked into lawmakers (mainly economic policies!) with data-driven decisions aimed to improve the society – which in this case, the betterment of students like you! Thus, I rest my case on why I am ready to become your VP of Legislative Affairs!
Hello, fellow students! My name is Mansu Kim, majoring in Business Administration. DVC is a school where you unleash your potential and grow your dreams, regardless of where you’re from, who you are: Everyone can start and I will be your running mate. I believe as a leader and Senator, I heavily value ‘taking action’ to be your trustworthy partner for your success in DVC. To solve the English fluency problem of international students, I arranged an English study group of students. It was a meeting of 3-6 students, however, I truly valued the meeting because I was able to address the problem of my peers, friends with my own hands. To advocate the students in COVID-19 situation, I attended College Council Meeting as a representative of students, to share the concern and acknowledge the seriousness of the situation to the President of the DVC, Susan Lamb, and successfully proposed the idea of the online instruction workshops to Council. Regardless of the volume of the impact that I can make, I seek for problems; I analyze and empathize; I take action. Fellow students, in the midst of chaos, it’s a time for us to highlight our resiliency, and I will be your partner to overcome this and beyond. Thank you.

GOALS: I will focus on the safety, health issues, and quality of education in my year.
- Bring the highest standard of the health-safety environment to campus, by organizing First-aid, AED kit in every building with the concentration of making a health care center.
- Communicate and execute full-research with faculty and staff to provide students with the best class experience.
- Form a ‘Country Ambassador’ with the purpose of every international student that can adjust to a smooth transition at DVC.

QUALIFICATIONS and EXPERIENCE
[ASDVC Student Government]
[College Council Budget Oversight Committee] [February] [2020] – [Present]
- Oversight of approximately USD 7.8 million as a student representative of ASDVC in Diablo Valley College Council to maximize transparency and efficient allocation of resources for students.
[Health Ad Hoc Committee Research Analyst] [February] [2020] – [Present]
Research and develop a plan to ensure the full-safety environment for students on campus. Analyzing the current status of First-aid kit, AED in every building and in the process of establishing the Health Center in DVC, which is the main target.

**[California Phi Beta Lambda]**

*State Officer - Program Development Intern* [September] [2019] – [Present]
- Develop and organize the State Fall Business Leadership Conference from 6+ colleges with 130+ participants. Represent 8 chapters, with over 200+ members of California Phi Beta Lambda.

**[Global Leadership Organization UC Berkeley Chapter]**

*Vice President of Service - C-Staff - General Member* [September] [2019] – [Present]
- Lead non-profit projects with 4+ UC Berkeley and DVC Students to bring positive impact to the local community while developing project management, people mgmt., and public speaking skills.

**[Republic of Korea Army]**

*Drill Instructor- Infantry leader - Senior Drill instructor* [October] [2017] – [July] [2019]
- Led and managed three Drill instructors, 80+ recruits under direct responsibility for 24/hrs. over 6+ weeks. Finished 8+ Bootcamp, ultimately led a total of 1800+ recruits without 0 accidents.
Greetings to fellow students at DVC! My name is Patricia Felice, and I am an international student here at DVC and currently majoring in Economics. In my second semester here, I am confident that I can be a great addition to the Executive Board of ASDVC and ASDVC in general. Moreover, my past experiences as President of Class of 2019 Cohort and President of Mathematics Club back in high school, previous experience in MUN (Model United Nation), and current involvement in Spark Social Impact (Berkeley Chapter) as Finance Officer (with overlapping role as secretary) has helped me in developing the skills, character, and knowledge that are essential to being a good leader, including punctuality, organization, public speaking, critical thinking, and many more. Moreover, my current involvement in the ASDVC Building Committee and receiving direct mentorship from the current ASDVC secretary made me fully aware of the responsibilities of the secretary as well as the expectations in completing the duties.

I always believe that leaders must lead and humble themselves to serve the community, and only through that, we can continue to create a better change. With running for this position, I am fully aware of the issue regarding the underuse and insufficient facilities in our campus; which may not have fulfilled students’ satisfaction. Therefore, in responding to this matter, I will be responsible for **planning, proposing changes, and adding features to our facilities that will better accommodate students’ learning experience as well as facilitate them in meeting their needs and safety.** Lastly, I am also willing to ensure the **transparency** of ASDVC and ensure that all campus members have access to minutes and agenda of the meetings.
Greetings everyone, my name is Matthew Kao, I’m a computer science major from Indonesia, and I am currently in my second semester at DVC. I am sure that I am the best candidate for this position because I was also part of the student council back in Indonesia; I am also a member of the ASDVC budget oversight committee. The thing that I feel differentiates me is my age. I am only 16 years old, and as we all know, younger people tend to play more games, and thus, I am sure that being an activities coordinator suits me very well. I realized that being a board member in ASDVC is a massive responsibility as I am not only representing my voice but also all of the students in DVC. By being a part of the ASDVC board, I promise to make all the events fun and exciting for everyone. Communication will not be a problem because many of my Indonesian friends are running for positions, and if they got it, we would be able to communicate better, and we can form better teamwork. To conclude, I will make DVC a better and more exciting place for everyone, and I am ready to take on the responsibilities of being an activities coordinator.
I’m Rafael Grande, a DVC student majoring in Business Administration. I’m currently in my second semester at DVC, and I aspire to be the Controller for the ASDVC Board. I’m conscious of the responsibilities that the position entails, and I am confident to be capable of performing my duty efficiently. I have been a part of ASDVC, and the Budget Oversight Committee since the fall 2019 semester. I was also appointed as one of the ASDVC representatives to the College Budget Committee. Out of ASDVC, I have been involved as an officer for AGS Honor Society for the past semester. I also participate in DVC PBL and Finance club to gain further experience and to hone skills that this position requires.

I aspire to improve individually and support student government’s fight to do so as well. As a controller, I will fight to look out for the efficient management of the monies we have been entrusted with. I’m committed to keeping the student’s needs first in line when evaluating budgets. Working along with other officers, I will strive to make ASDVC better.
A first-generation college student of immigrant parents aspiring to be a Computer Engineer, Gerardo, whom many have come to know as “Panda” has grown to contribute to the greater Diablo Valley College (DVC) campus, as well as the communities surrounding it. As an Engineer, he realizes he can’t run away from problems. That’s his life’s work - To solve problems. It is the pursuit of these efforts and endeavors that hope to lead him to matriculation within the University of California (UC) public university system, and if the honor presents itself, the opportunity of serving all humankind as a member of NASA. Having served various clubs and organizations on and off campus for two years, these numerous adventures have enlightened “Panda” with better understanding of the different cultures, perspectives, ideologies, and desires of the DVC body. Starting as an Inter Club Council (ICC) club representative, he has grown from becoming executive officer of Web Operations, facilitating communication between the Pleasant Hill/San Ramon Campuses and ensuring equitable conversations between all members, to continuing his dedication to students with the office of President and Secretary for the Kendo Club, Officer of Internal Accord for LatinX Student Alliance, and serving as ASDVC’s Officer of Environmental affairs for 2 terms. In his ASDVC office, “Panda” has worked toward making DVC more sustainability conscious with the help of the DVC Sustainability Committee, such as installing more bike racks and water refill stations, while assisting fellow Executives with initiatives of enacting a Health Center, extension of library hours, and continues to combat the turmoil and strife of injustices that has been affecting the campus including racial prejudice, California wildfires, and CORVID-19. Still finding time, also volunteers for MESA and aiding outside organizations like OneJustice as a volunteer interpreter with DACA and DREAMERs events.

As Environmental Affairs Officer, “Panda” wants to finish his work; the school shut down has significantly affected progress to many initiatives, including Earth Day, Reduction of Waste on-campus, Collaboration with the DVC Sustainability Committee for Bike-to-Work Day and Local Beach Cleanup Events to name a few. In addition, the ASDVC Board still has projects that need to be realized, including Diversity Day, The Extended Library Hours, and the establishment of a Health Center. I want to help, them, too. More than ever, the students need their school to elevate them. It is our job. This is our school. We must protect it. That’s the mission: to serve and protect the individuals that compose this extraordinary community, taking on responsibilities that will benefit the matriculation of future students, and convince them not to give up on themselves, the same way he has before. Those negative experiences are the motivation necessary to remember the suffering that others can have. There’s always a choice: to do nothing, or to be better. “Panda” promises to
dedicate his heart, spirit, and soul: To never abandon the DVC family that has grown alongside him. Together we can remember to spread the word and to fight for change. Where we go from here, is a choice he leaves entirely to you.
